## Skills:

- **Programming Languages** : C, Java, Python.
- **Data Base** : SQL.
- **Web Technologies** : HTML, CSS.
- **Technology** : Java Full Stack Development

## Projects:

**AMIGO-ASSIST:** The whole theme of our work is to provide assistance to the vehicles which had broken down in an unknown location.

- The project is to create a web application that should be user friendly so that users can easily access our web page. Based upon the location of the user the nearby mechanic shops will be displayed for then, the users select any of our partnered mechanic shops.

- In case, If user's vehicle had exhausted without oil, our team will provide the basic requirement of 1 liter so that they can reach nearby filling station.

**Levy A Tax On:** Motto of our project is to provide transparency in the transactions that will be made by government, we have leverages to the existing systems.

- Corruption is the main culprit of India's slowed development. To avoid this, we make the transactions made by the government very transparent and clear to the citizens by using the distributed ledger of the block chain.
- In the process of auditing the organizational data we have to appoint a specific personal for it and he will charge some amount, to avoid this we use a ledger of blockchain to generate the report of transactional data, that makes the auditing process simple.

### **Achievements & Workshops:**

- Participated in college level hackathon on Full stack development and had won first prize
- Attended for a workshop on "MONGODB," REACTJS" conducted by Code Tantra Academy.
- Participated in technical events held in our college.
- Team Member for the project "AMIGO-ASSIST".
- Participated and won prize in sports competition conducted in school level.
